## OBJECTIVE

---

To start my career in the IT industry where I can apply my programming skills, work on software and data-driven solutions, learn new technologies, and contribute to the growth of the organization.

## EDUCATION

---

|                                                                                                  |             |
|--------------------------------------------------------------------------------------------------|-------------|
| <b>Master of Computer Applications</b> , Chhtrapati Shivaji Maharaj University, Panvel           | 2024- 2026  |
| <b>Bachelors of Computer Application</b> , Siddharth University,Kapilvastu,Siddharth Nagar (U.P) | 2021 - 2024 |
| <b>Higher Secondary (12th) – [CBSE Board]</b> , R.C.C Public School,Basti (U.P)                  | 2019 - 2021 |
| <b>Secondary (10th) – [CBSE Board]</b> , Blooming Bud’s Academy , Khalilabad (U.P)               | 2017 - 2019 |

## SKILLS

---

### Technical Skills

- Programming Languages and Frameworks : **Python** and **Django**
- Web Development: **HTML**, **CSS**, **JavaScript**
- Data Science and Machine Learning: **NumPy**, **Pandas**, **Matplotlib**, **Seaborn**,**Machine Learning**
- Tools and Technologies: **Power BI**, **MS Excel (Basic)**, **Git**, **GitHub**

### Soft Skills

- Problem Solving, Analytical Thinking, Time Management, Communication Skills, Quick Learner

## EXPERIENCE

---

|                                                                                                                                                                                                                                                                   |              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Data Science Training</b>                                                                                                                                                                                                                                      | 6 months     |
| QSpiders                                                                                                                                                                                                                                                          | <i>Vashi</i> |
| <ul style="list-style-type: none"><li>• Gained practical knowledge in Machine Learning and Data Analysis</li><li>• Built projects using Python, Pandas, NumPy, and Matplotlib</li><li>• Performed data cleaning, preprocessing, and basic visualization</li></ul> |              |

## PROJECTS

---

### SmartBin – Smart Waste Management System (Django)

- Developed a web-based waste management system to monitor garbage levels
- Used Django, Python, HTML, CSS, and JavaScript
- Implemented backend logic and handled data processing
- Improved system efficiency through structured data management

### House Price Prediction (Machine Learning)

- Built a predictive model using Linear Regression
- Used Python, Pandas, NumPy, and Scikit-learn
- Performed data cleaning, preprocessing, and model training
- Predicted house prices based on input features
